

THE DRAGON'S REST QUEST

Modular Board

Layout Example

INTRODUCTION

This guide lists all the pieces needed for creating the classic layout of everyone's favourite dungeon crawler as well as giving you enough pieces to start creating your own maps!

The files used in each step are organised into folders numbered 01-06 to make the guide easy to follow.

All clips are found in the **Dragons Rest Clip System**. My recommendation is to clip only the corridors and edges together using **DRCS Clip.STL** and place the rooms floating in the gaps. Use **DRCS Clip Tab.STL*** clipped into the walls and doors to allow for easy wall removal and door placement.

*Doors and some walls use the discrete version of this clip, they are identifiable by the smaller clip hole on the base.
